

Come alive with Science

This spring, there are some exciting events planned to bring science to life for everyone across the East Midlands! Here are just two of them...

Science Games days in schools

Your school is one of 150 across the region that will work with real scientists on some exciting science-based projects. The projects will take place during special Science Games days in school – which will run as part of National Science and Engineering Week (9-18 March).

Schools will also hold twilight/evening events to celebrate the success of the Science Games days.

The Skybolt rocket

Nottingham: Old Market Square, 10 March, 10am – 4pm

Don't miss this fantastic, free public event

It's your chance to see the amazing nine metre high Skybolt rocket and talk to rocket scientists about the UK's contribution to space exploration.

Science opens a world of exploration, discovery and challenges – come along and join us!
